LEICA X

LEICA X-CAMERAS

The best in their class.

Sooner or later, enthusiasts seeking a rigorous definition of what constitutes good photography notice that it's not the subject alone that makes a picture that's really special. It's also the photographer's personal and conscious way of seeing things. In other words it's personality that gives these pictures a soul, and transforms them into images that truly touch the heart. In their own unique way compact Leica X-Cameras encourage photographers to capture such exceptional pictures, at a level of a quality unrivaled in their class – bright, clear, and authentic, and in brilliant natural color.

The design of the Leica X, the Leica X Vario, and the Leica X-E reflect the look of legendary Leica cameras. They are also the world's only compact cameras to bear the quality seal made in Germany. Every one of them is designed and constructed with the expertise, experience, and innovative spirit of 100 years of Leica – and the passion for photography that represents. To create the incomparable feeling that invariably captures the photographer's heart and mind when a Leica X-Camera becomes his or her lifetime companion.

01 LEICA X

Once you have held the new Leica X in your hands, you will never want to hand it back. It is the essence of photography. It unites everything that defines the art of photography. The joy of seeing unforgettable moments in a particularly personal way – and capturing them forever. Combining a large high-res sensor, an especially fast prime lens with a maximum aperture of f/1.7 and a classic focal length of 35 mm, it gives photographers the freedom to explore the creative possibilities of selective focus. The choice of premium materials employed in its construction, for instance its full-metal body, is another factor in the irresistible appeal of the Leica X – it is simply a typical Leica that reflects its noble heritage.

02 LEICA X VARIO

As a compact camera, the Leica X Vario offers the unique combination of an outstanding zoom lens with autofocus and manual focus modes and a high-res APS-C format sensor that ensures exceptional picture quality in every situation. Its zoom lens, with equivalent focal lengths ranging from 28 to 70 mm, is particularly effective for capturing subjects spontaneously and its flexibility opens up new horizons of creative freedom. It's a masterpiece of the art of modern engineering and a perfect tool for capturing spectacular pictures.

03 LEICA X-E

The Leica X-E is the handiest member of the X-Family and will quickly become your indispensable companion every day. Its classical 35 mm focal length is in the tradition of the most successful Leica cameras – and numerous icons of photography. The outstanding grip of the textured covering on its metal body and its ultra-compact form factor make it a joy to hold and handle. And to rediscover a new every day.

LEICA X

The essence of photography – made in Germany.

A first glance at the clean lines and iconic design of the new Leica X reflects what this camera stands for: photography in its purest form. Its classical restraint and instantly intuitive handling concept create inner calm, a time and space for creativity. It forges a special relationship between photographer, subject, and moment, yielding personal and expressive images that capture richly meaningful events – a certain feeling, a unique moment that tells a special story.

Its robust and exceptionally fast Leica lens creates a feeling of freedom and trust. For the sensitive exploration of selective focus. For superbly bright and clear exposures – even in low light. True to life and in brilliant natural color.

Full-size view, the camera is available in a silver and black anodized finish.

BRILLIANT IMAGE QUALITY

thanks to an extremely fast high-performance lens

The extremely fast initial aperture of its Leica Summilux 35 mm f/1.7 ASPH. lens (35 mm equivalent) creates an exceptionally beautiful bokeh, as a result, the exploration of the creative possibilities of selective focus is fascinating and particularly rewarding with the Leica X. And all this is possible without an extra lens hood – the lens is almost completely insensitive to flare and ghosting affects. It delivers bright, clear, and incredibly sharp photos – from infinity to a close-focus distance of only 0.2 meters.

SUPERIOR BRILLIANCE

thanks to an unusually large high-res sensor

The larger the sensor, the better the picture quality. The CMOS sensor of the Leica X fulfills what its APS-C format promises: outstanding photos with exceptional color fidelity and the finest rendition of details – even in unfavorable lighting conditions. Every subject is true to life in every respect – and is as unique as the way in which you see it with your own eyes.

Full-size view, the camera is available in a silver and black anodized finish.

Full-size view.

HIGHEST QUALITY IN EVERY RESPECT – the finest quality plus perfection in design

The new Leica X fascinates with its timeless design that subtracts the superfluous to concentrate on the essentials. Above all, it delivers the highest quality with regard to materials and finish – down to even the tiniest details. Everything is provided in the finest quality metal available – from the body and the control elements to the optimized thumb switch and the lens cap. Magnesium is used for the front and rear body shells, and the top deck and baseplate are in anodized aluminum. A particular feature of the high-quality concept is a top deck machined from a single block of metal.

FOCUS ON PHOTOS thanks to intuitive handling

The idea of removing the superfluous elements, leaving only the essentials, thus optimizing the ability to concentrate on the picture – that’s really the basis of the handling concept of the new Leica X. Its clearly laid-out functions can be grasped intuitively and are simple to use. The fast and easy switch between manual and automatic modes inspires creativity. The large, high-resolution display shows precisely what the camera is capturing – brightly and in perfect detail – and provides a clear view, even in sunlight. All to ensure that there is no distraction from what’s most important: the picture.

ENHANCED SPONTANEITY thanks to fast autofocus

Many fascinating photographs impress just as strongly by capturing the decisive moment as with the subject they portray. The fast, precise, and almost-silent autofocus of the Leica X enables spontaneous and discreet photography. And, as the decisive moment is often gone in a flash, the camera shutter is released as soon as the autofocus locks on to the subject – with no lag at all. The autofocus zone can be selected manually to define the ideal plane of sharpness. It delivers the perfect synergy of technical features and imaginative creativity.

MOTION PICTURES in full-HD

For all those situations in life where single pictures are not enough to capture the scene, the Leica X can record them in full-HD video. Easily and in exceptional quality. The videos are recorded at a resolution of 1920×1080 pixels and 30 full frames per second – and saved in the popular MP4 format. So nothing is easier than sharing video clips with friends and family.

More essential information can be found at www.x.leica-camera.com

LEICA X VARIO

The art of engineering – made in Germany.

Vibrant cities and peaceful landscapes, people and still lifes, light and shadow – fascinating subjects just begging to be captured can be found everywhere, and the Leica X Vario is an invitation to spontaneously capture those moments as they come. With flexibility and intuition.

Despite its compact size, the Leica X Vario combines a large APS-C-format sensor with a versatile zoom lens. For fast changes of focal lengths – just as each subject and situation requires. This combination also enables it to achieve a level of picture quality that is unrivaled in its class. With its intuitive handling concept, hands and fingers immediately know exactly what to do – or switch in a flash from manual to automatic control. The art of German engineering – thanks to first-class materials, excellent finishing, and a minimalist design concept. All at the highest level. It's a Leica original.

Full-size view, the camera is available in a silver and black anodized finish.

CREATIVE FREEDOM thanks to a multitude of focal lengths

The Leica X Vario brings together a sensor that is extremely large for a compact camera with a high-performance Leica Elmar 28–70 mm f/3.5–6.4 ASPH. lens (35 mm equivalent) to create an unrivaled masterpiece of the fine art of engineering. The wide range of focal lengths makes the Leica X Vario extremely versatile – for expansive indoor photos, picturesque landscapes, or outstanding portrait pictures.

NATURAL COLORS thanks to an unusually large sensor

The unique combination of a zoom lens and a large APS-C-format CMOS sensor enables creative compositions with selective focus beginning at the maximum aperture of f/3.5, even in unfavorable light. This makes the Leica X Vario a camera predestined for the creation of photographic masterpieces of exceptional brightness, clarity, and rich detail.

Full-size view, the camera is available in a silver and black anodized finish.

Full-size view.

PREMIUM CLASS in terms of both design and quality

At first glance, it is clear that the design of the Leica X Vario owes much to the Leica M. This can be recognized in various features of its design – and the obvious use of only the finest materials in its construction. It projects an unmistakable feeling for the essentials. Before receiving their anodized finish, the baseplate and top deck are painstakingly machined from solid blocks of aluminum. Its robust body is then completed with front and rear shells in light – but exceptionally strong magnesium. Its soft leather trim ensures a particularly comfortable feel and grip.

SUPREMELY SIMPLE and easy to use

The handling concept of the Leica X Vario also follows the principle of concentrating on the essentials – taking pictures. Its handling is perfectly simple and intuitive, thanks to logically laid-out controls and the ability to switch between automatic and manual modes in a flash. At the press of a button, its 3" high-resolution monitor displays an overview of all setting options. To guarantee that photographers never lose track of what's most important: the picture.

MEMORABLE MOMENTS in full-HD video

The Leica X Vario can also preserve memorable experiences as motion pictures. Naturally in full-HD video – with 1920 × 1080 pixels and 30 full frames per second. Video recording is started and stopped by simply pressing a dedicated button on the top of the camera. An integrated wind-cut filter ensures outstanding audio clarity. And, to ensure that personal videos can be quickly shared with friends, they can be saved as Internet-friendly MP4 video files. Shooting motion pictures with the Leica X Vario is as easy as taking pictures – and the results are just as exciting.

FASTER AND MORE RELIABLE superior autofocus

The autofocus of the Leica X Vario can be described in a few words: fast, extremely precise, and almost silent. The shutter can be released immediately after focusing without any lag. The autofocus zone can be selected manually to define the desired area of maximum sharpness. The change from autofocus to manual focusing is especially intuitive: it only takes a quick movement of the focusing ring off the autofocus setting to enable precise manual focusing on details, aided by the practical magnification of the central part of the image.

LEICA **X-E**
Compact quality – made in Germany.

Life writes new stories, every day. Stories that are worth recalling. The exceptionally lightweight Leica X-E is the ideal constant companion and ensures that special moments are never missed. It's amazingly compact, but with everything it needs to take fantastic pictures. Pictures of dazzling quality.

The Leica X-E may be the most compact member of the X-Family, but it has all the characteristics of a true Leica – an exceptionally sharp, fast lens, the finest materials and construction, and finished with a passion for details, and an unmistakable classic design. And, like all other X-Cameras, it also bears the seal of quality: made in Germany. A camera for every day – to capture moments of life and transform them into unforgettable memories.

Full-size view, the camera is available in titanium anodized finish.

THE CLASSIC 35 mm lens

The 35 mm lens is considered by many to be the classic for reportage photography and has been used to capture numerous iconic photos in the history of photography. The Leica X-E takes full account of the enduring legacy of this particular focal length. Its Leica Elmarit 35 mm f/2.8 ASPH. lens (35 mm equivalent) delivers truly exceptional optical performance. Together with naturally reproduced perspectives and dimensions, its moderate wide-angle character makes it ideal for countless real-world situations. It's for pictures that captivate with dazzling quality and authenticity. For creating new iconic photos.

SIZE DOES MATTER when it comes to image sensors

Even the most compact member of the X-Family, the Leica X-E, has an unusually large APS-C-format CMOS sensor. And it, too, makes no compromises when it comes to picture quality, natural color rendition, and the finest resolution of details. Even in low light.

Full-size view, the camera is available in titanium anodized finish.

Full-size view.

IT FASCINATES with exceptional design and unsurpassed quality

The elegant design of the Leica X-E is dedicated to compact ergonomics and ease of use. Visually iconic, it also treats the hands to an exciting tactile experience. Because its light but strong full-metal body lends it a tangible robustness – and feels as good as it looks. Exceptional materials brought together and finished with a passion for exquisite detail. The Leica X-E: a true X-Camera in both design and quality – made in Germany.

INTUITION is the best user manual

Is the Leica X-E easy to use? It couldn't be easier. Its automatic functions and manual setting options are so intuitive they become second nature in no time. To ensure that nothing distracts from taking pictures. This makes the Leica X-E the ideal camera – especially for less experienced users. The experience of shooting perfect Leica pictures right from the start is all part of the package.

REAL-TIME REACTIONS thanks to ultra-fast autofocus

The autofocus of the Leica X-E makes focusing really fast, extremely precise, and almost silent. It's perfect for situations where spontaneous reactions are essential for capturing the right moment – no matter what the situation. At the same time, the autofocus zone can be set to realize the pictures photographers see in their mind's eye. It delivers complete freedom to concentrate on the subject.

LEICA X-CAMERAS

Technical details.

**BRILLIANT
PICTURE QUALITY**

The sensor of all three Leica X-Cameras is impressive in every respect. And no wonder: with a diagonal of 28.4 mm, this CMOS image sensor in APS-C format is unusually large for the compact camera class. Despite the high resolution of over 16 megapixels, the individual pixels on the sensor are still very large and collect a lot of light. Even in unfavorable lighting conditions. This is where the compact cameras of the X-Family reveal their true strengths: they enable photos with extremely low image noise, high dynamic range and precise color rendition. The combination of the large sensor with their excellent Leica lenses ensures exceptional picture quality. What's more, the sensor size expands the creative scope of photographers with the opportunity to explore the creative interplay of planes of focus and depth of field.

1/2.33"

**IDEALLY
ILLUMINATED**

In situations where shooting demands an additional source of light, all three cameras offer photographers the option of adding light from an integrated flash. In addition, the X-Family cameras all also feature an accessory shoe for providing more flash power and lighting flexibility when needed. The Leica X is compatible with the Leica accessory flash unit SF 26. See extras, page 25.

**WORK FLOW
INCLUDED**

A powerful and user-friendly software package from Adobe® is provided with every X camera. All Leica X photographers can download Adobe® Photoshop® Lightroom®, the professional work flow solution for still picture and video processing, free of charge for Apple Mac® OS X or Microsoft Windows®. This complete solution for modern digital photography offers a wide range of options for creative image manipulation. All imaging parameters like white balance, exposure, sharpness, color balance, and saturation can be refined in post-processing until the desired results are achieved. The software also offers a wide range of functions for the management and exporting of digital images. Thanks to extended video processing options (beyond simply archiving and viewing videos), the software now enables video editing and the extraction of stills from video recordings.

The digital workflow solution Adobe® Photoshop® Lightroom® is available to Leica X customers as a free download.

The technical details of the Leica X, Leica X Vario, and the Leica X-E can be found as downloads on our website at www.x.leica-camera.com, www.x-vario.leica-camera.com and www.x-e.leica-camera.com

LEICA X-CAMERAS

The most important features at a glance.

CAMERA	LEICA X
LENS SPEED	The X-Camera with the fastest lens – for shooting pictures with particularly shallow depth of field (Leica Summilux 23 mm f/1.7 ASPH.).
FOCAL LENGTH (35 mm equivalent)	Moderate wide-angle characteristic. 35 mm.
IMAGE SENSOR	An unusually large sensor for the compact class: APS-C format, CMOS sensor with 16 MP resolution.
VIDEO	Videos in full-HD quality for capturing unforgettable moments in motion pictures.
CONTINUOUS SHOOTING CAPABILITY	Up to 5 frames per second at full resolution.
ISO SENSITIVITY	High sensitivity up to ISO 12500 for richly detailed pictures even in poor lighting conditions.
VIEWFINDER	Optional accessories: high-resolution, 2.4 MP, Visoflex finder with tilt-and-turn function, eye-detection sensor and integrated GPS option.
MONITOR	High-resolution, 3" LCD screen for brightness and clarity, even in bright sunshine.
DIMENSIONS (W×H×D/WEIGHT)	5.2×2.8×3.1 in., 16/17oz. (without/with battery).
SOFTWARE	Adobe® Photoshop® Lightroom® for professional image processing.
FLASH	Integrated flash – compatible with the Leica accessory flash unit SF 26.

LEICA X VARIO	LEICA X-E
Fast throughout the entire zoom range (Leica Vario-Elmar 18–46 mm f/3.5–6.4 ASPH.).	Especially compact and fast lens for outstanding pictures, even in low ambient light (Leica Elmarit 24 mm f/2.8 ASPH.).
Focal lengths from 28–70 mm for increased flexibility.	Moderate wide-angle characteristic. 35 mm.
An unusually large sensor for the compact class: APS-C format, CMOS sensor with 16 MP resolution.	An unusually large sensor for the compact class: APS-C format, CMOS sensor with 16 MP resolution.

LEICA X ACCESSORIES

Country meets vintage.

COUNTRY

The classical Country Style collection harmonizes particularly well with the silver Leica X. The protector and cases are crafted in a unique mix of materials of the finest leather and robust, rugged canvas. They're extremely hard-wearing – and real eye catchers.

PROTECTOR X (Figure 01)

The protector offers safe and secure grip and perfect protection for the Leica X in every situation. And it looks irresistible, too.

WRIST STRAP X (Figure 02)

The Country Style wrist strap features tabs on the split ring to protect the camera against scratching.

VISOFLEX CASE X (Figure 04)

The finder is always well stowed away in the practical Visoflex case – and ready for action in a flash. When the flap with the magnetic clasp is opened,

the finder automatically rises from the case. This case can be securely attached to all Leica carrying straps with its crossed safety clips.

EVER-READY CASE X (Figure 03)

Stylish design in combination with the classical leather-canvas mix: this splash-repellent, ever-ready case provides ideal, all-round protection for the Leica X. The camera can remain in the case when in use.

CARRING STRAP X

Comfort when carrying the Leica X is guaranteed by the padded shoulder piece of the carrying strap. It is made from the same leather that is used in the mix of materials for the protector and the cases. It features additional tabs on the split ring to protect the camera against scratching.

VINTAGE

The camera accessories of the Vintage collection for the Leica X are exclusively crafted from the finest, highly polished, undyed, and untreated leather. The intentional patina effect of the leather lends it a uniquely timeless and exquisite character.

EVER-READY CASE X (Figure 01)

Elegance in its most practical form: this compact, splash-proof, ever-ready case provides perfect protection for the Leica X. And the camera can stay in the case while you're shooting.

VISOFLEX CASE X (Figure 02)

As useful as it is stunning: this practical protective case for the Leica Visoflex makes taking out the finder so wonderfully easy. When the flap with the magnetic clasp is opened, the finder automatically rises from the case. Thanks to crossed safety clips, the case is ideally protected against loss and is compatible with all Leica carrying straps.

PROTECTOR X (Figure 03)

The ergonomically designed protector is perfectly matched to the Leica X. For optimum camera protection in every situation.

CARRYING STRAP X (Figure 04)

The carrying strap features additional tabs on the split rings to prevent scratching of the camera body. It comes with a comfortably padded shoulder piece for outstanding ease of carrying, even for extended periods.

WRIST STRAP X

The practical wrist strap adjusts ideally to every wrist and also features additional tabs on the split ring to protect the camera against scratching.

LEICA X VARIO | LEICA X-E **ACCESSORIES**

Exquisitely esthetic.

EVER-READY CASE X-E (Figure 03)

This superbly stylish, water-repellent, ever-ready case for the Leica X-E offers extensive protection and is crafted from organically tanned cowhide. It's particularly practical: the camera can be kept in the case while in use.

PROTECTOR X-E (Figure 02)

Practical and elegant in equal measure: the camera protector in untreated leather offers an outstanding grip and perfect protection for the Leica X-E in every situation.

LEATHER CASE X-E (Figure 01)

The Leica X-E is ideally protected and makes an eye-catching style statement when carried in this superbly crafted, black leather case.

EVER-READY CASE X VARIO (Figure 04)

The name says it all: in this water-repellent, ever-ready case, the Leica X Vario is always ready for action – and can remain safe and sound in the case when shooting. Available in finest black or cognac-colored leather.

PROTECTOR X VARIO (Figure 05)

The ergonomically designed protector for the Leica X Vario, crafted from premium-quality natural leather, is available in the colors black and cognac, and offers optimum protection for the camera at all times.

SYSTEM BAG (Figure 06)

Robust and roomy: the robust system bag is made of the same resilient and water-repellent fabric used by the automobile industry for the construction of soft tops for convertibles. It provides room for the Leica X, the Leica X Vario, or the Leica X-E together with their respective accessories. More system bags in various sizes and materials can be found on the Leica website.

CARRYING STRAP

The robust carrying strap in black or cognac-colored leather is extremely convenient to use: the padded shoulder piece sits comfortably on the photographer's shoulder and additional tabs on the split ring protect the camera against scratching.

WRIST STRAP

The elegant wrist strap in black or cognac features additional protective tabs on the split ring to prevent scratching of the camera.

WRIST STRAP X-E

Perfectly designed to match the Leica X-E: the look and feel of this practical carrying strap in black calfskin will satisfy even the most demanding users.

LEICA X-CAMERAS EQUIPMENT

Perfectly equipped.

HANDGRIP X AND X VARIO (Figure 02)

The practical handgrip can be mounted on both the Leica X and the Leica X Vario. It helps to compensate for the weight of the zoom lens and provides a safer and steadier grip when shooting.

HANDGRIP X-E (Figure 03)

In the safest of hands: the ergonomically designed handgrip for the Leica X-E is an aid to safe and steady camera handling and also enables one-handed shooting.

FINGER LOOPS (Figure 01)

Even greater steadiness can be achieved by mounting finger loops on the handgrip. Thus, the camera can also be used comfortably for one-handed shooting. The finger loops are available in a choice of three sizes.

VISO FLEX X (Figure 04)

The high-resolution, electronic accessory viewfinder for the Leica X enables photography from unusual angles, for more creative scope when shooting. A sensor detects the user's eye. When the eye is looking through the finder,

the camera monitor is turned off – when the eye is no longer detected, the LCD display comes on again. The viewfinder also features an integrated GPS option.

EVF 2 (Figure 05)

The high-resolution, electronic accessory finder for the Leica X Vario and X-E features 1.4 MP resolution and a 90° swivel function that enables shooting from unusual angles, e.g. at ground level or from a bird's-eye view. When attached, all relevant information is displayed in the viewfinder.

FINDER X-E

The accessory mirror finder in black with a 36 mm bright-line frame is simply slid into the accessory shoe of the Leica X-E. It enables a clear view of the subject, without putting strain on the battery.

SF 26 FLASH (Figure 06)

As the powerful SF 26 flash unit for the Leica X has a vertical tilt function, it opens up countless new opportunities for lighting subjects and fill-in flash. It also doubles up as an LED floodlight for shooting motion pictures.

LENS HOOD X VARIO

The lens hood is simply screwed on to the lens of the Leica X Vario and protects the front lens from rain and minor knocks. Picture contrast is also increased as the lens hood efficiently eliminates many types of reflections.

REPLACEMENT BATTERY BP-DC8E

It's a good idea to take along as a spare battery to extend the joy of photography.

MINI-HDMI CABLE

The mini-HDMI cable allows a direct connection of the Leica X, the Leica X Vario, and the Leica X-E to a TV with an HDMI port. This enables video recordings and still pictures to be viewed in the best possible quality.
