## Please follow these steps to install the new firmware for your Leica Q:

1. Switch off the camera.
2. Remove the battery from the camera, recharge it to 100%, and insert it back into the camera.
3. Download the new firmware file to your computer.
4. Prepare a memory card:
  - a. Make sure the card has at least 60 MB of free disk space.
  - b. It is recommended to format the card in the camera before continuing with the installation process.
5. Copy the firmware file to the root directory of the prepared card.
6. Insert the card into the camera.
7. Switch the camera on while keeping the video record button pressed.
8. Press YES to start the update process.
9. Wait until the update process is completed.
10. Switch the camera off and back on. You can now resume using your Leica Q.

### **Important:**

**DO NOT** turn off your camera, **nor** remove the memory card, **nor** remove the battery during steps 8 and 9.

**DOING SO CAN CAUSE SERIOUS DAMAGE TO YOUR CAMERA!**
